• A bit of history

How we structure organizations,

Smith (1780): division of labour

Taylor (1900): Industrial efficiency. select, train, and develop each employee rather than leaving them to train themselves.

Provide "Detailed instruction and supervision of each worker in the performance of that worker's discrete task"
Divide work nearly equally between managers and workers, so that the managers apply scientific management principles to planning the work and the workers actually perform the tasks.

Fayol (1920): improve management

Base of all management (school) activity
